## About AFP Construction

AFP Construction is a multi-disciplined nationwide company and incorporates a fleet of new machinery and equipment available for hire to improve the performance and efficiency of work, our current fleet ranges from 1 ton – 40 ton excavators including Hitachi super long reach excavators, Komatsu Intelligent GPS machines, low ground pressure dump trucks, widespread excavators, high specification wheeled excavators and loading shovels, most of which are fitted with over pressure units, all machines can be supplied with a variation of attachments to suit your needs.

We operate a policy of continual improvement in all areas of operation

We specialise in Plant Hire, Earthworks, Ground Maintenance, Site Remediation and Demolition, Fencing, Ecological Contacting and Revetment Works.

## Training

We are continuously developing the skills for all the workforce and any specialised training required to deliver works safely, efficiently and on schedule, Training includes

- CSCS Management
- CPCS Operators
- SSSTS
- NRSWA
- Confined space
- Non licenced asbestos
- First Aid
- Scotland's Mental Health First Aid Training
- IPAF
- PASMA

## Accreditations

We currently have the following industry accreditations and certification:

- CHAS (The Contractors Health and Safety Assessment Scheme)
- CITB (Construction Industry Training Board)
- Construction Line Gold
- SPOA (Scottish Plant Operators Association)
- CPCS (Construction Plant Competence Scheme)
- Achilles Building Confidence

## SHORT HISTORY OF AFP CONSTRUCTION

Albert Fredrick Parker moved to UK from Southern Ireland in the 1950s where he worked with various companies within the construction industry. He met Mary in Gateshead, Tyne and Wear where they married in 1963 and moved, due to work, to Central Scotland. Albert, best known as Fred, continued to work in the Industry as a Site Agent all over Scotland.

### FAMILY BUSINESS STARTS

In 1976 he and Mary made the brave decision to branch out on their own and formed AFP Construction (Bishopton) Ltd. The early days were hard for the couple and they worked hand in hand to build the business over time. In June 1979, the company seemed to take off, Fred was able to purchase a new Bedford truck, a new JCB, new compressors and a new car, this was the start of him building the company along with Mary. Their son Kevin joined his parents at the young age of 16, over the years Fred mentored and taught him the ins and outs of the industry, his wealth of knowledge was endless.

Sadly, Mary died in 2008 after suffering a major stroke. As an accomplished bookkeeper her knowledge was invaluable as she passed the reins to daughter Fiona who left her career in nursing and joined the company in 2006.

The decision by Fred and Kevin to break into plant hire was realised in 2016 and the fleet has grown rapidly over these last few years.

### SECOND GENERATION: KEVIN TAKES OVER

Fred, although in semi-retirement, still had a say in all major decisions made within the Company until the day he sadly passed away in 2018 after heart surgery, his advice will continue to impact on how the company is run.

Kevin now runs the business day to day and he and Fiona plan to continue the family business started by their parents, they look forward to continued growth and maintaining the ethos of quality and value in serving customers in the second generation.

Albert Frederick Parker (Fred)

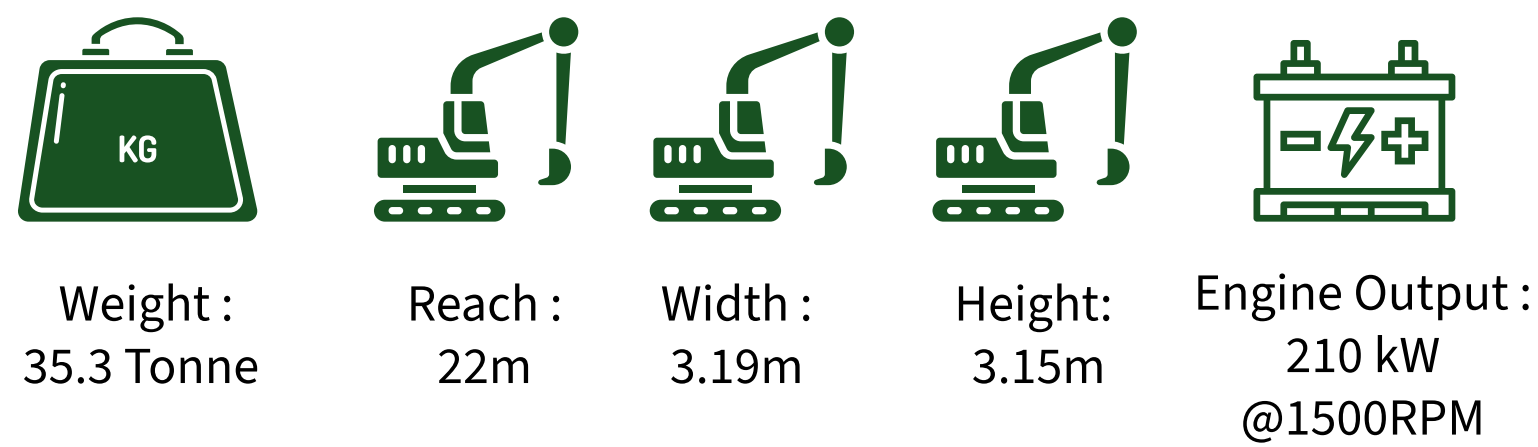

Fred and Mary

Fred, Kevin & Fiona

# Hitach ZX350 SLR- 22M

The Hitachi ZX 350-7 super long reach offers the perfect solution for projects that need you to reach further and dig deeper than standard models. It is ideal for dredging rivers and lakes, reformation of shorelines and landscaping works. The Hitachi ZX 350 - 7 has features such as GPS and over pressure units built in to improve overall efficiency and performance which our clients have found Invaluable.

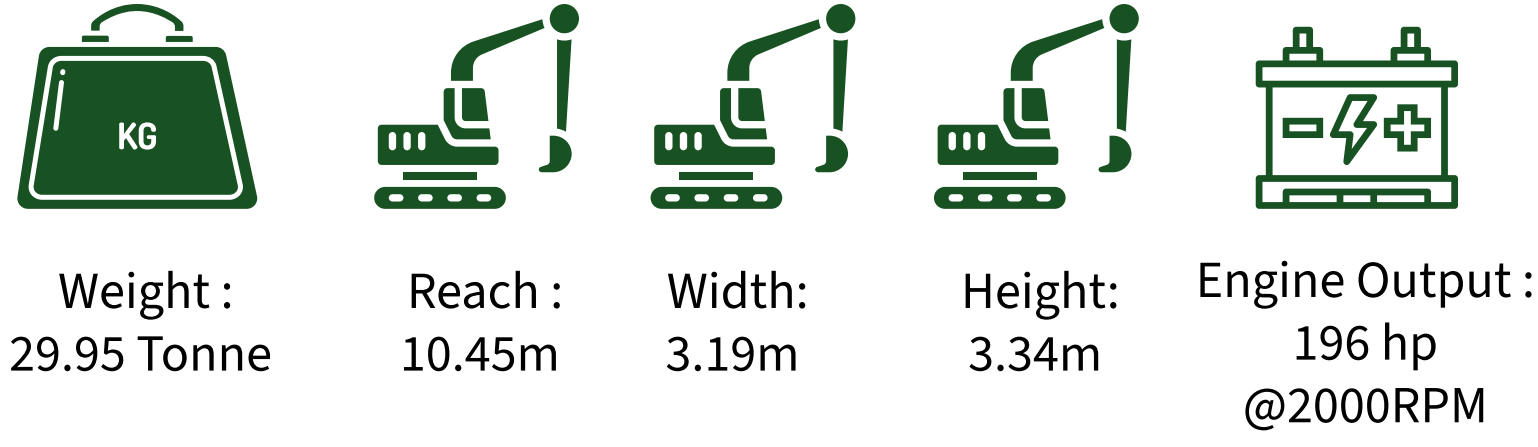

## Attachments

Breaker, Grapple, Pulveriser , Compactor, Shear, Magnet

# Komatsu PC290 LCI

The AFP Komatsu PC290 LCI-11EO Intelligent machine was the first of its kind in Scotland, it has a fully Integrated system which is ideal for civil engineering, groundworks and construction projects. It's built in GPS system allows greater accuracy and efficiency for customers enabling designs to be adapted on an ongoing basis. The Komatsu PC290 LCI - 11EO can also use a wide range of attachments similar to the standard Komatsu PC290 machine e.g. breakers, forks, pulverisers, hydraulic selector grabs, compactor plates.

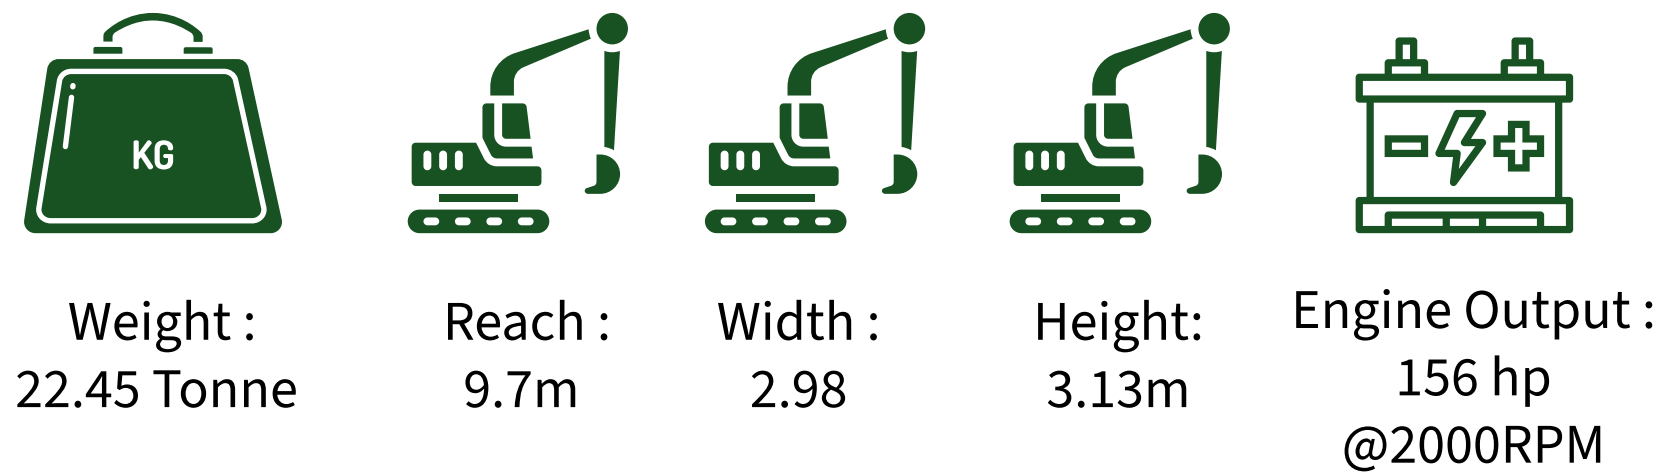

## Attachments

Breaker, Grapple, Pulveriser, Compactor, Shear, Magnet

# Komatsu PC210 LCI

The Komatsu PC210 LCI - 11 with Intelligent control 2.0 is a fully integrated system that limits over and under digging which improves accuracy and performance. It's ideal for excavation automatic grading, construction, and landscaping projects where you work to specific design models. The Komatsu PC210 LCI-11 also has the touchscreen monitor for adapting designs in real time allowing information to travel between engineers and operators efficiently. We can also use a wide range of attachments similar to standard PC210's e.g. Breakers, shears, magnets, pulverisers etc.

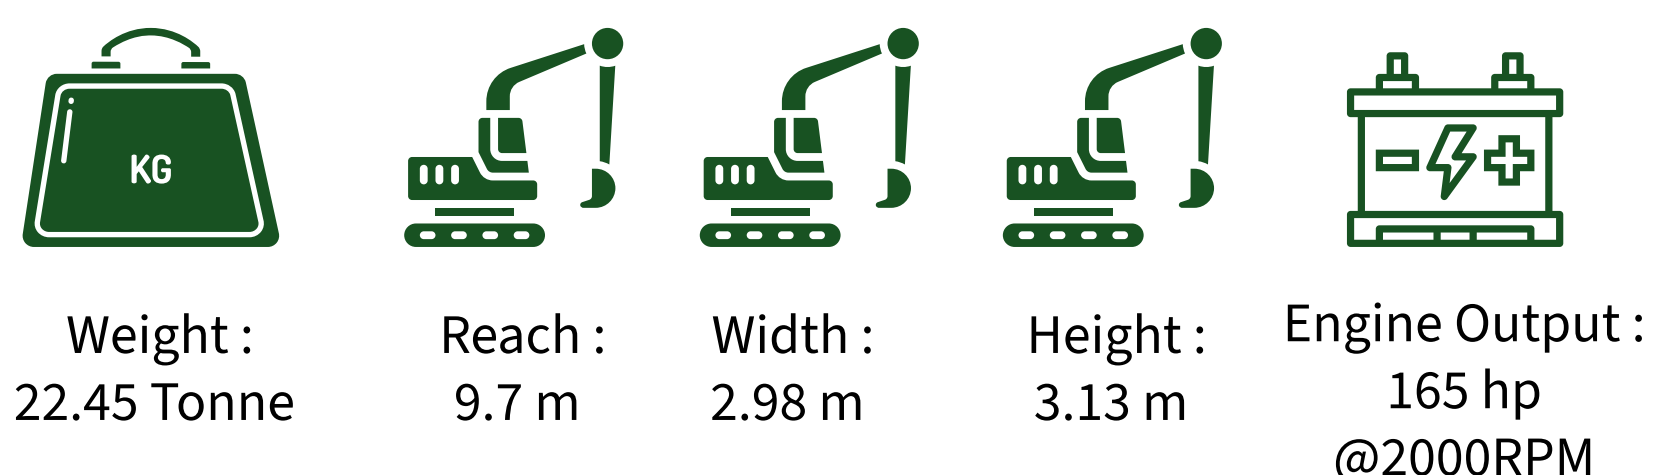

## Attachments

Breaker, Grapple, Pulveriser, Compactor Shear, Magnet

# Komatsu PC 210 LC

The Komatsu PC210 LC-11 is a powerful and precise machine that is equipped to efficiently carry out various tasks e.g excavating, trenching, site clearance and landscaping works. The Komatsu PC210 with its quick hitch and dual flow hydraulic functions allow it to change a variety of attachments regularly e.g. hydraulic selector grab, breakers, forks, compactor plate, shears etc. It's environmentally friendly EU stage V engine allows improved performance and greater productivity for customers.

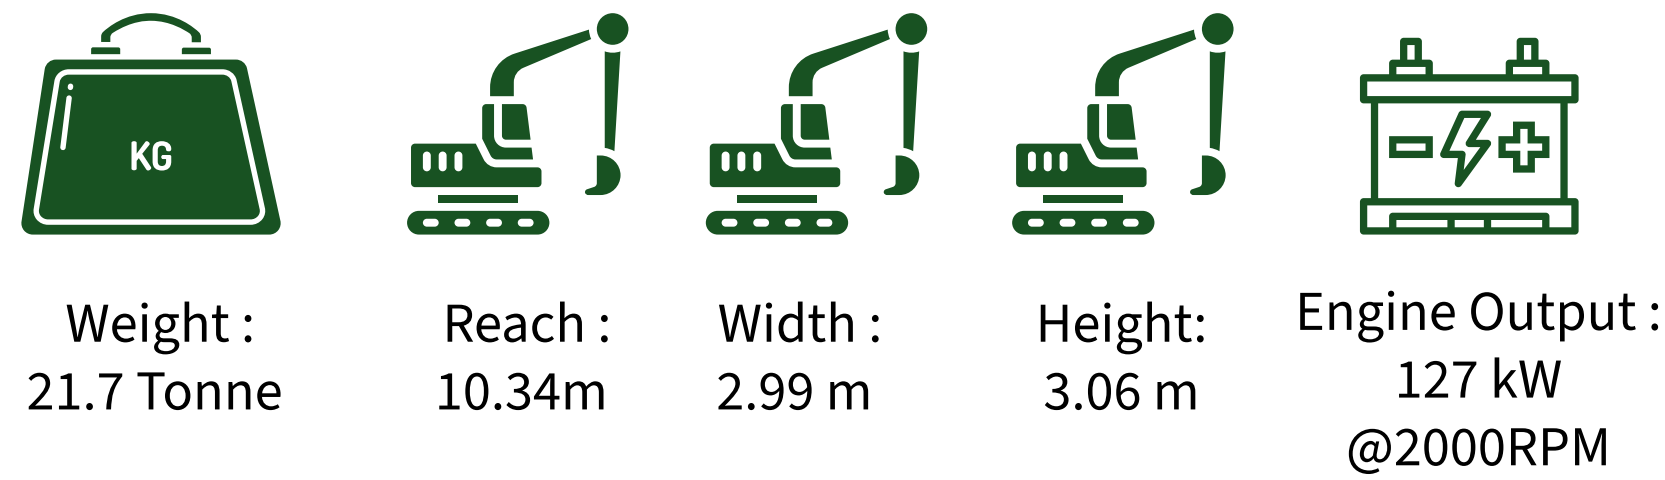

## Attachments

Breaker ,Grapple, Pulveriser,Compactor, Shear, Magnet

# Kobelco SK210

The Kobelco SK210 has a highly efficient hydraulic system which minimises fuel consumption while maximizing power. With a nimble movement and ample digging power, this excavator promises to improve job productivity.

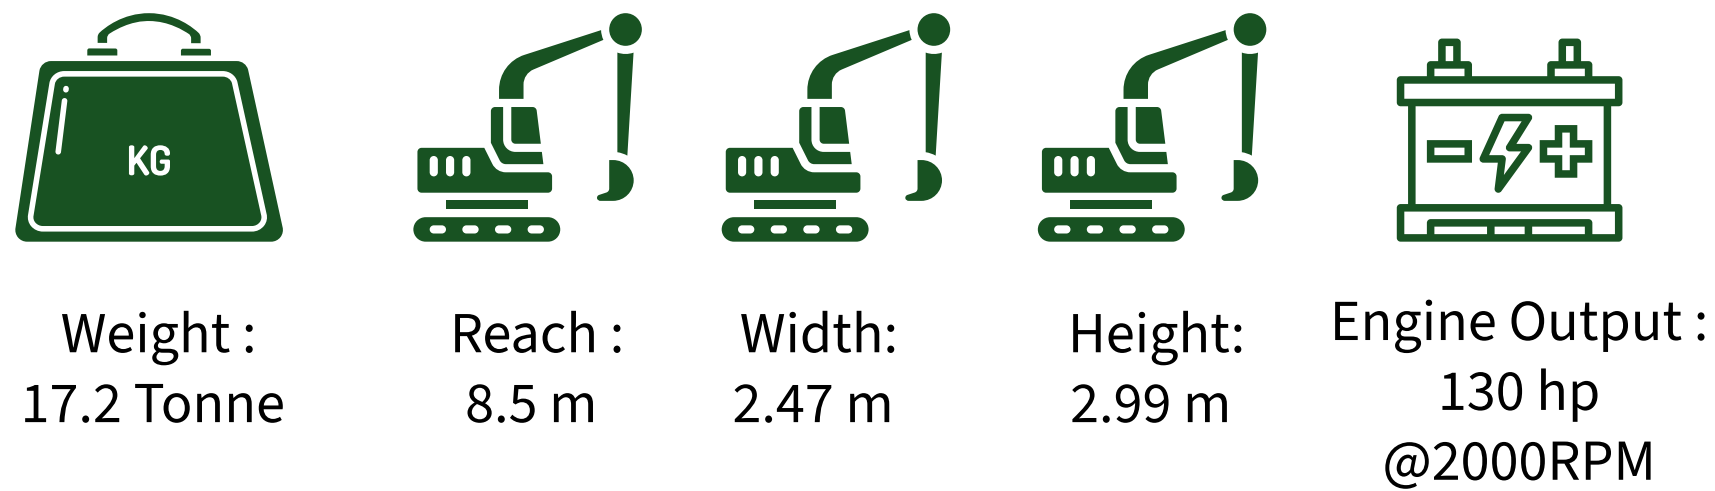

## Attachments

Breaker, Grapple, Pulveriser , Compactor, Shear, Magnet

# JCB JS160

The JCB 160 wheeled excavator is a versatile adaptable machine which is ideal for onsite or roadside projects. Its light innovative and smooth controls improve comfort and productivity and with its quick hitch system built in it allows attachment changing fast and easy. As an added feature the JCB 160 has a 360 Engcon attachment which will reduce movements in soft ground which improves efficiency. Attachments available include tilting bucket, forks, pincers, breakers, compactor plate etc.

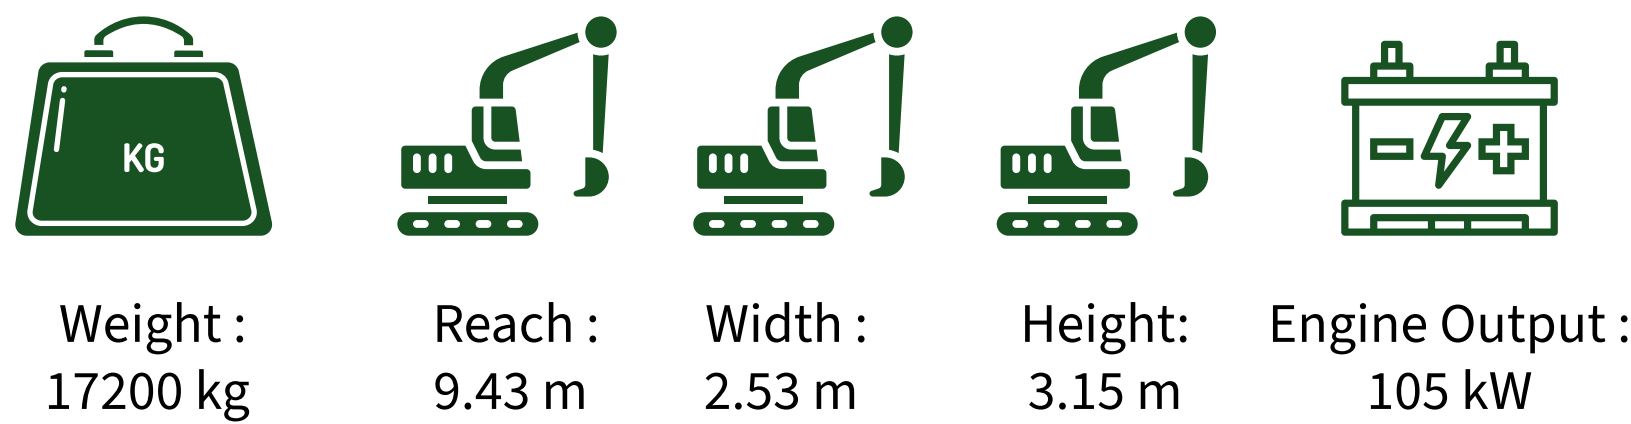

## Attachments

Engcon, Breaker, Riddle Bucket, \Forks, Compactor

# Hitachi ZX150W

The Hitachi ZX150w is built for comfort and efficiency with its 105.0kw powered engine and expanded cab interior, making for a enhanced work environment for the operator this will allow for greater productivity with reduced fatigue, also with it's 270o birds eye view and aerial angel camera system safety is enhanced for site personnel.

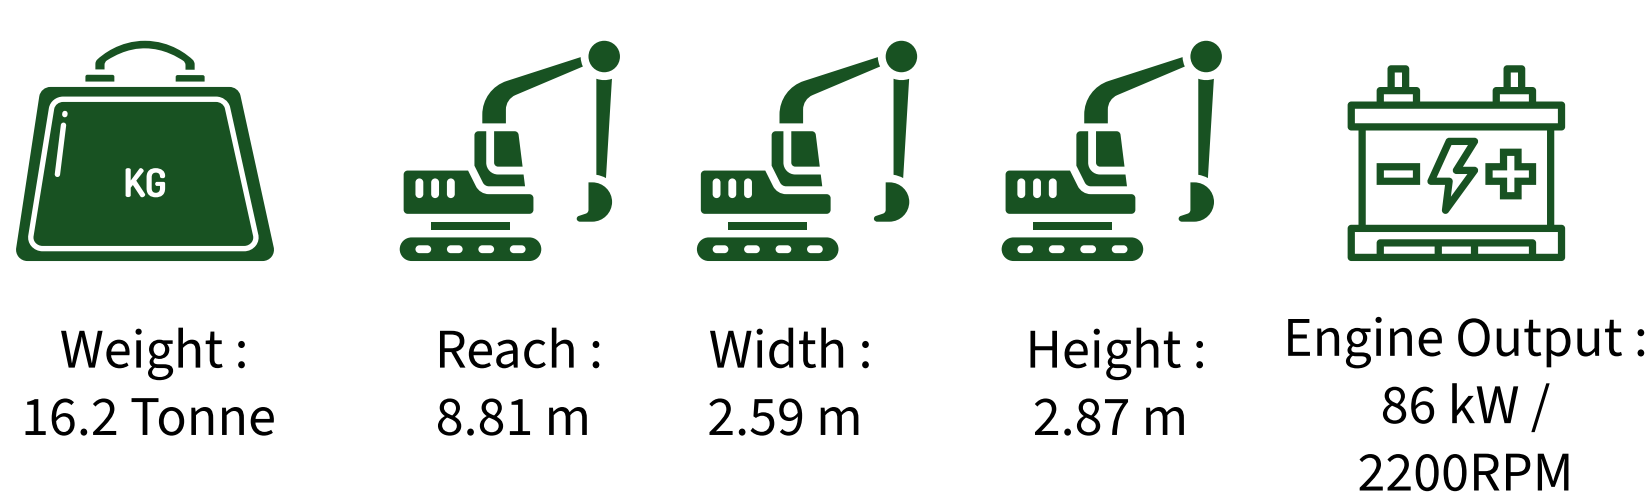

## Attachments

Breaker, Riddles Bucket, Forks, Compactor

# Kobelco SK140

The Kobelco SK140 with the 360o Engcon attachment is ideal for precise landscape works, ground works, trenchworks and working around services reducing movement in soft ground. This in turn will improve efficiency and productivity enabling project deadlines to be met which will satisfy the client. Our Kobelco SK140 is also fitted with height and slew restrictors which is beneficial when working near power lines or live services.

## Attachments

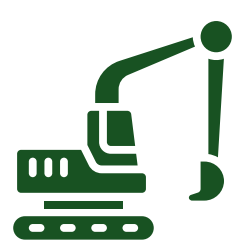

Engcon, Breaker, Grapple, Pulveriser , Compactor, Magnet

# Komatsu PC138

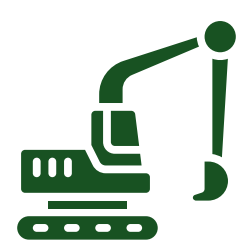

The Komatsu PC138 US-11 is a quick and precise machine with a small tail swing which allows confined space works ideal for muck shifting, landscaping and construction works with it's EU stage V engine reducing it's environmental impact and improving efficiency. Its quick hitch dual flow hydraulics allow for a wide selection of attachments (i.e. breakers, compactor plate, grab, pulverisers etc) to be fitted quickly to increase productivity.

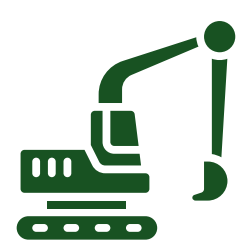

Weight :  
15.8 Tonne

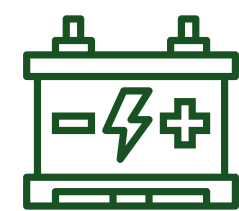

Reach :  
8.3 m

Width :  
2.59 m

Height:  
2.81 m

Engine Output :  
97.2 hp  
@2050RPM

## Attachments

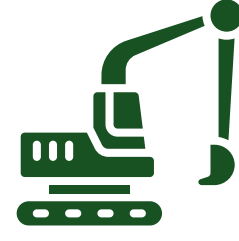

Breaker, Pulveriser , Compactor, Magnet

# Kobelco SK130

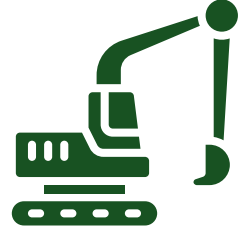

The Kobelco SK130 is a robust efficient machine which is ideal for working in confined space areas. The 3600 eagle eye screen gives the operator all round vision and its stage V compliant engine improves its environmental footprint. The machine has a quick hitch system in place which improves performance within multi-attachment projects.

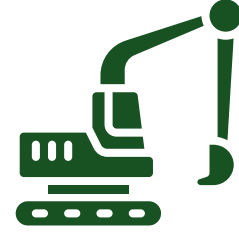

Weight :  
14.2 Tonne

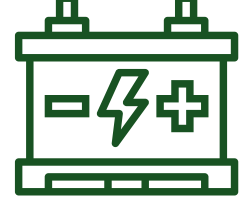

Reach :  
6 m

Width:  
2.49 m

Height:  
2.71 m

Engine Output :  
78.5kW /  
2000RPM

# Takeuchi TB295W

The Takeuchi TB295W wheeled excavator is an extremely powerful and versatile machine. It's new Deutz engine gives a massive power increase ideal for heavy duty groundworks and road travel. We feel this specific excavator is a valuable addition to our fleet giving us more flexibility an a variety of projects. Our customers have provided positive feed back and with an experienced operator productivity improves substantially.

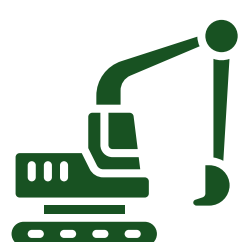

Weight :  
9425 kg

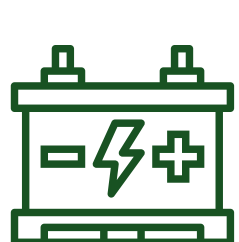

Reach :  
7.5 m

Width:  
2.2 m

Height:  
3.01 m

Engine Output :  
85 kW

## Attachments

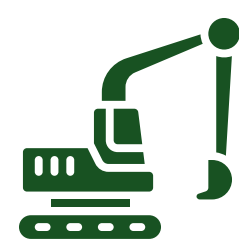

Breaker, Pulveriser , Compactor, Magnet

# Kubota XK080

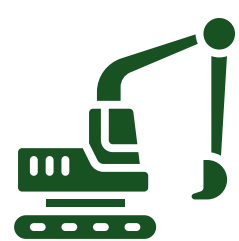

The Kubota KX080-4a has a rugged and reliable direct- injection Kubota engine with CRS and a DPF muffler. Its new 2 pump load sensing system. Improves smoothness when operating front attachments and in turn increases efficiency and productivity. It's a highly robust mid-range excavator which is ideal for various site activities e.g. trackwork, loading, road formation, landscaping etc. the Kubota 8T is a popular and invaluable addition to our fleet.

Weight :  
8.19 Tonne

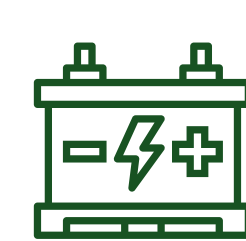

Reach :  
7.33 m

Width :  
2.2 m

Height:  
2.54 m

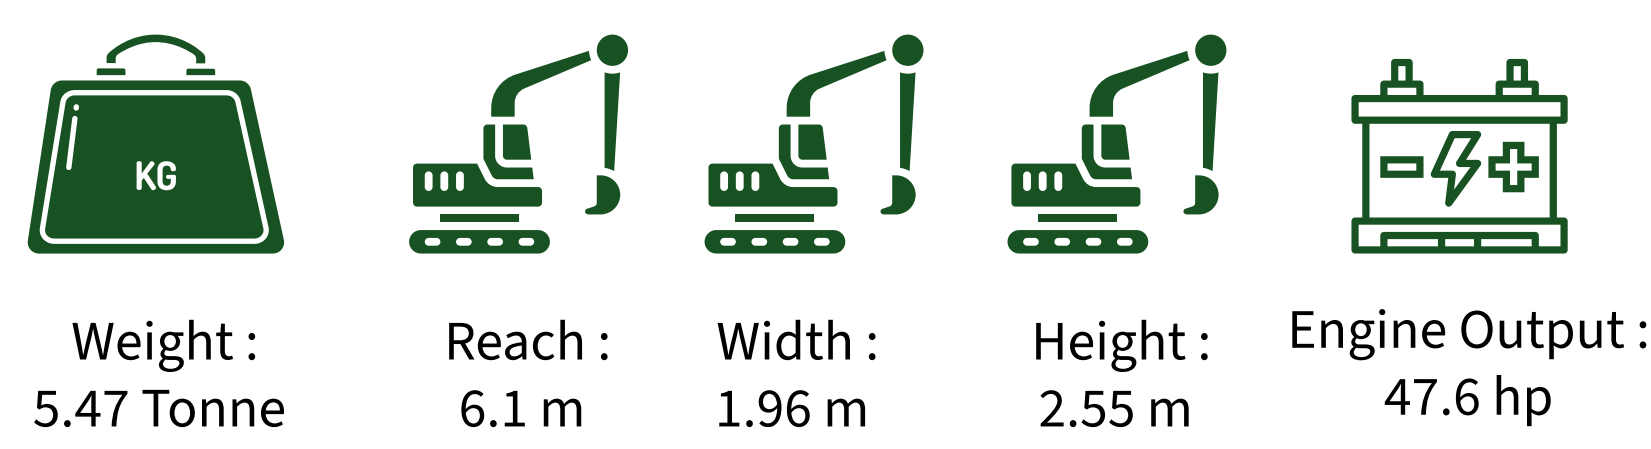

Engine Output :  
47.8 kW

## Attachments

Breaker

# Kubota U55

The Kubota U55-4 excavator complete with its deluxe cab and 47.6HP powered injection engine maximises its digging and lifting capabilities. It is an extremely versatile machine which is compatible with several attachments including various buckets, riddle bucket and breaker. The Kubota U55-4 also has a front dozer blade fitted as standard making it ideal for site works..

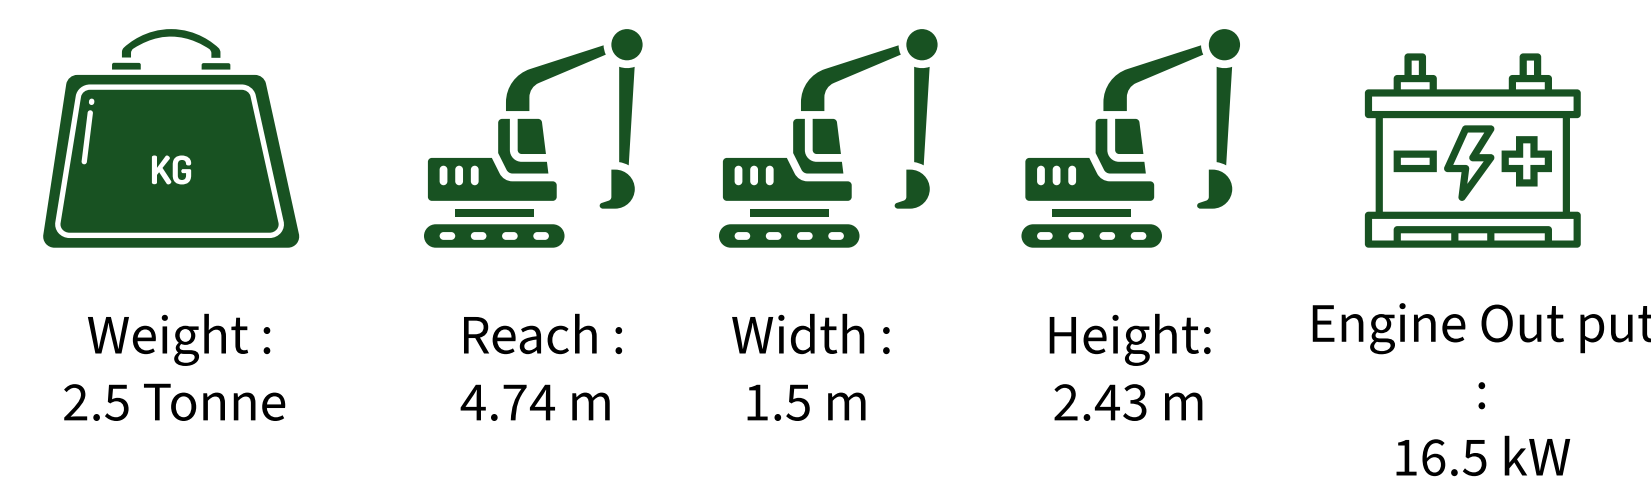

## Attachments

Breaker

# Kubota U27-4

The Kubota U27-4 mini digger has the largest cab for its size in the market, providing comfort and luxury for the operator the U27-4 with its 15.6KW engine gives the power to tackle the toughest tasks onsite and its zero-tail swing allows access to confined spaces. It is a vital asset for onsite works especially around live services.

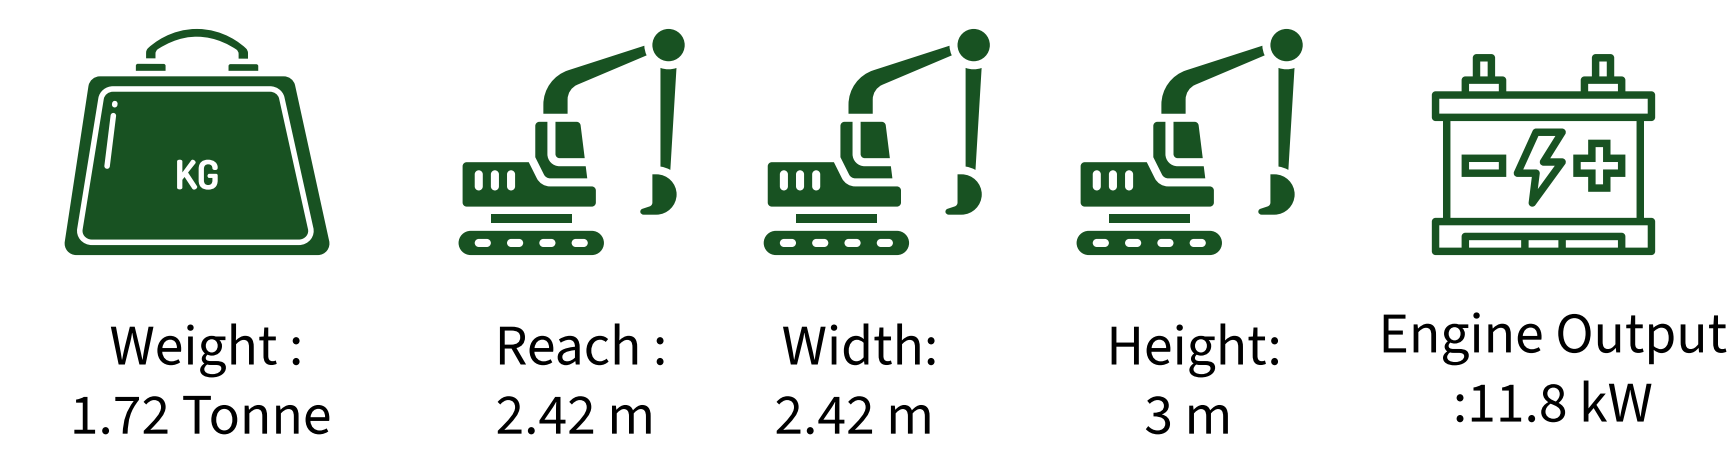

## Attachments

Breaker

# Kubota KX018-4

The Kubota KX018-4 with its 11.8KW engine and impressive grabber power is extremely flexible and versatile. Weighing in between 1.5T – 2 Tonne, with rubber tracks makes it highly accessible and ideal for roadside works or confined space works. Other features include its deluxe cab and quick hitch system which make it efficient and productive in all weathers.

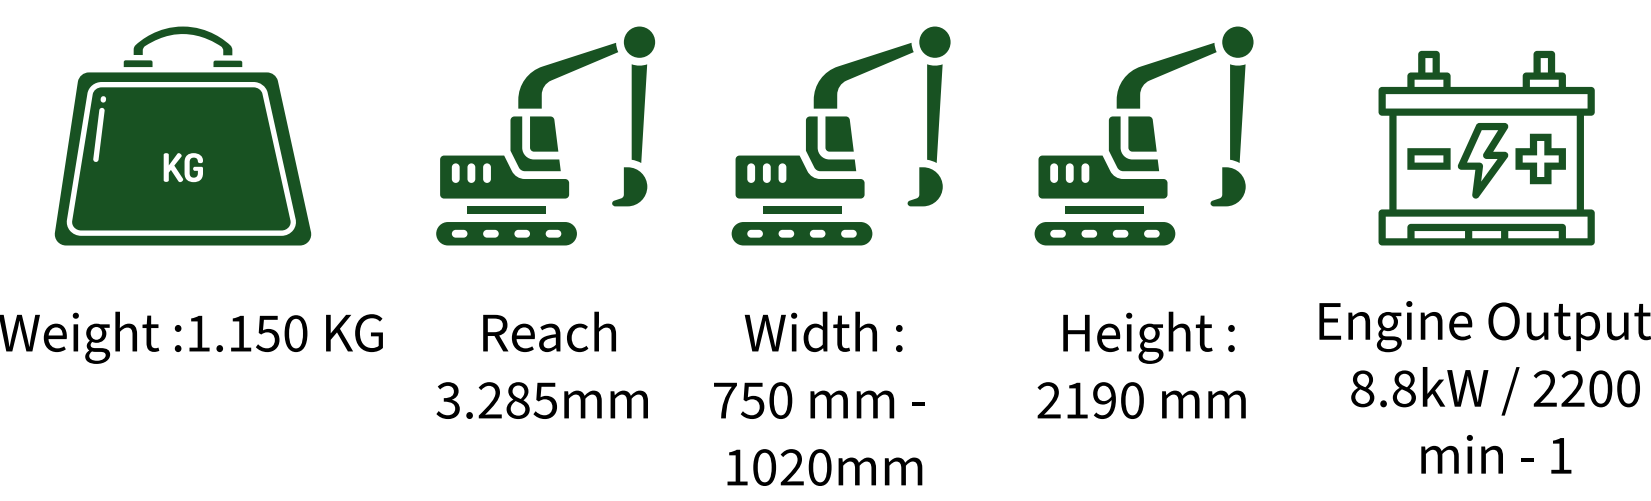

## Attachments

Breaker

# Takeuchi TB210R

The Takeuchi TB210R with its EU stage V / Tier 4 emission engine, retractable undercarriage and foldable ROPS is ideal for entering standard doorways and working in confined spaces. It has many enhanced features for greater comfort, efficiency and serviceability, proving a valuable addition to our fleet for working on specialised projects.

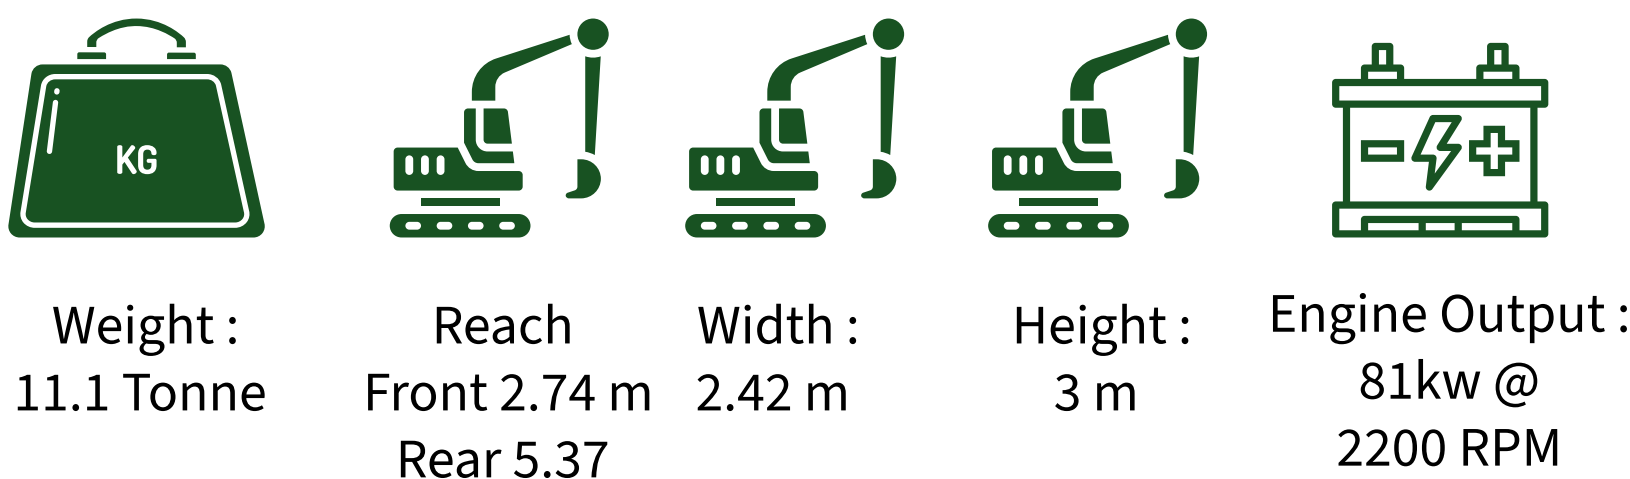

## Attachments

Breaker, Forks

# JCB 3CX

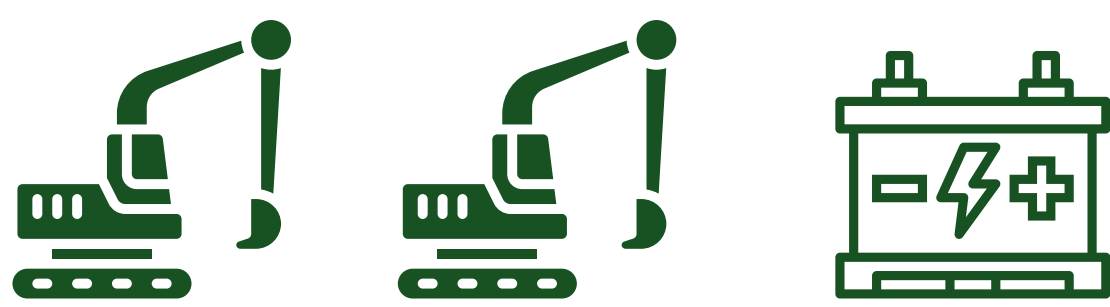

The JCB 3CX ECO PLUS features a high performance 81KW engine which allows it to be extremely versatile for site works. The new 3CX have all new auto features e.g. auto stop, auto 2WD, auto seat select, auto drive select etc which improve comfort and efficiency. The JCB 3CX is the best selling worldwide excavator with both its backhoe and loading shovel applications covering several tasks on site including trackwork, loading wagons, site clearance and road formation. It also has a variety of attachments for the backhoe operations.

Attachments  
Breaker, Forks

# JCB 540-170 Telehandler

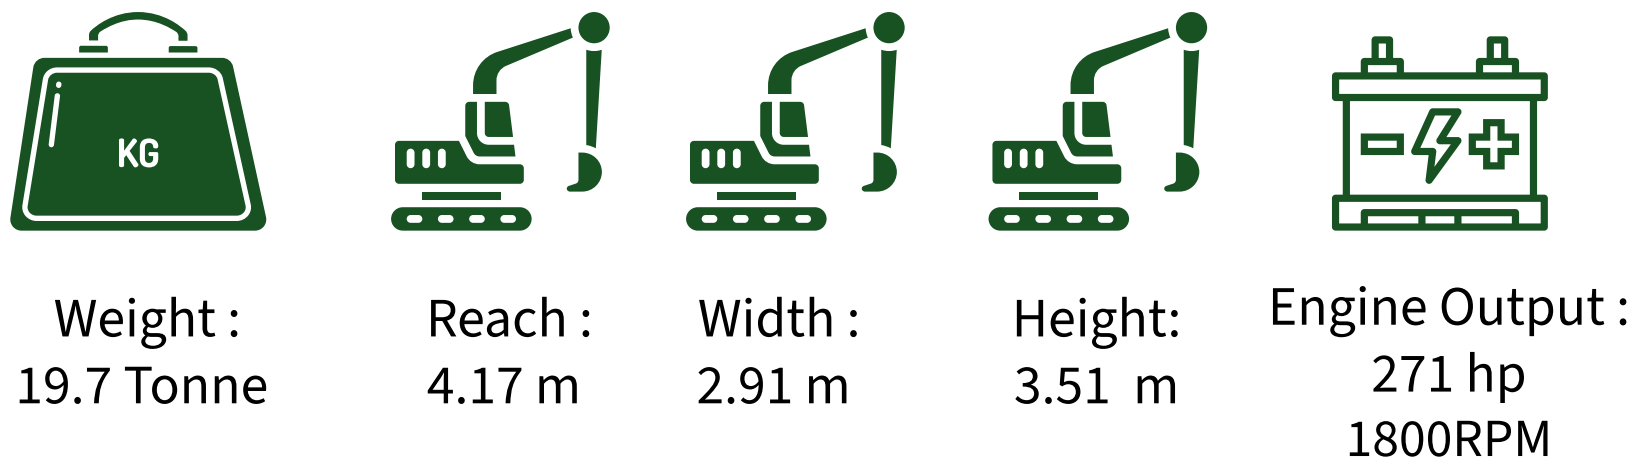

The JCB 540-170 Telehandler has an unrivalled performance, versatility and visibility with superb fuel efficiency. It has a JCB dieselmax stage V compliant engine with a maximum gross weight of 4100kg and reach of 20M at full extension. The JCB telehandler has a built-in reverse camera and audible alarm as an additional safety measure. The JCB telehandler has low running costs with a high resale value.

Attachments  
Breaker, Forks

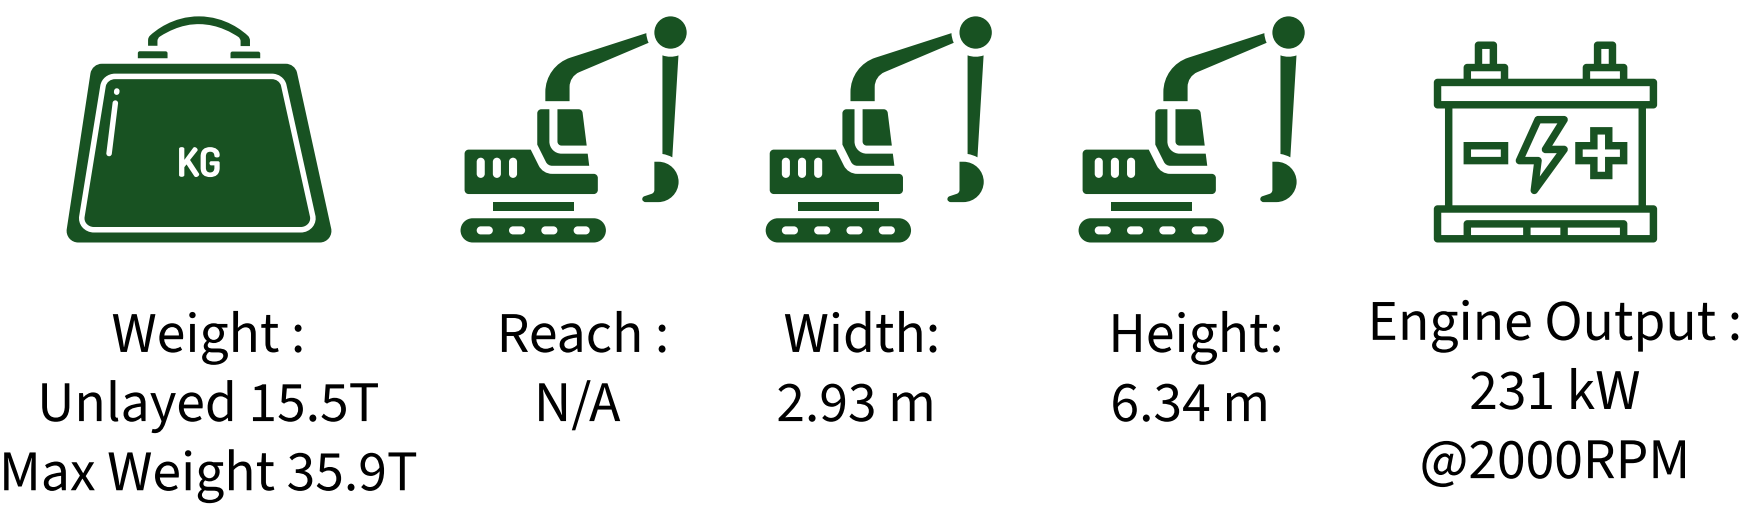

# Doosan DL 320-7

The Doosan DL320-7 is powered by a DL08 engine with stage V emissions compliance and has 3 different working modes SAT, standard and power which improves performance and efficiency. The transmission has 5 gears which boosts acceleration and maximises traction resulting in optimum productivity. Internally the Doosan smart touch system allows various functions e.g. machine settings, rear view camera, radio, HVAC, weighing system and Doosan smart guidance. All of which gives the Doosan excellent penetration power and high speed in all conditions.

# Hydrema 922G

The Hydrema 922G has the highest power to weight ratio on the market and has very low ground pressure, with the lowest unladen weight making it extremely flexible for all terrains. Its articulated chassis with pendulum bar and double hydraulic stabilisers in the centre pivot allow a high degree of stability for both driving and dumping allowing it to function in all weather conditions. The Hydrema 922G is a major asset for earth moving and site clearance works which customers can rely on for efficiency and performance in all projects.

# Massey Ferguson 7716

The Massey Ferguson 7716 tractor with its 24-speed six-power shift transmission and 150 HP engine is a key asset with a wide range of applications. Massey Ferguson tractor operations include towing trailers, hydraulic water tankers, fuel bowzers and attaching cement mixers / road brushes / grass cutting implements in tandem with the PTO system. It is a valuable tool for both off / on road projects.

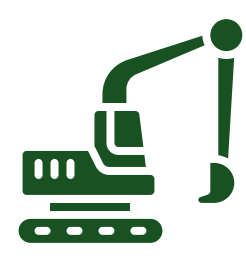

Weight :  
5.8 Tonne

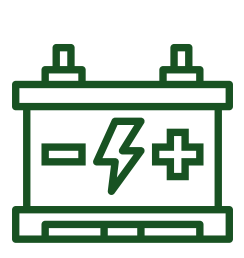

Reach :  
N/A

Width :  
2.55 m

Height:  
2.98 m

Engine Output :  
150 hp  
@10000RPM

## Attachments

Dust supression tanker, Dump truck trailer, Log splitter

# Massey Ferguson 7618

The Massey Ferguson 7618 tractor with its 24-speed six-power shift transmission and 172 HP engine is a key asset with a wide range of applications. Massey Ferguson tractor operations include towing trailers, hydraulic water tankers, fuel bowzers and attaching cement mixers / road brushes / grass cutting implements in tandem with the PTO system. It is a valuable tool for both off / on road projects. Providing high reliability and efficiency optional features include over pressure units (OPS) for remediation sites.

Weight :  
6.3Tonne

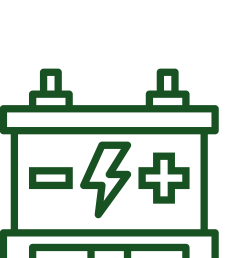

Reach :  
N/A

Width :  
2.55 m

Height :  
2.98 m

Engine Output :  
129 kW

# Ammann 13T Roller

The Amman 13T soil compactor provides industry leading compaction outputs whatever the application. The single drum roller with its EU stage V 116KW engine can be used for both padfoot and smooth drum operations. Materials such as soil, sand type 1 etc can all be compacted making it a versatile machine for back filing and stabilisation works.

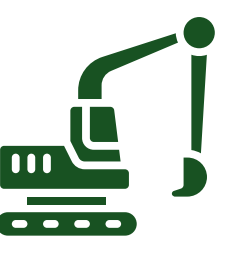

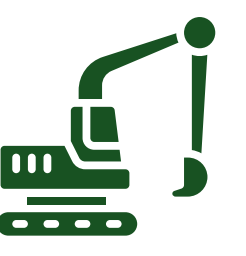

Weight :  
12,600 kg

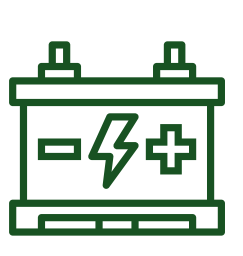

Reach :  
N/A

Width :  
2.13m

Height:  
N/A

Engine Output :  
116 kW  
2200RPM

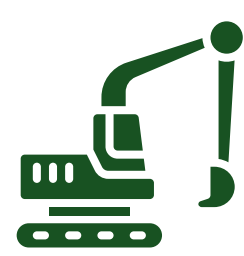

# Bomag 120 Roller

Whether for asphalt or earth works – compaction is a easy with our BOMAG 120 tandem roller. The open-sided drums increases flexibility in confined spaces with the drums suspended on one side only and are off centre resulting in compactation cleanly right up to high walls of buildings and other boundaries..

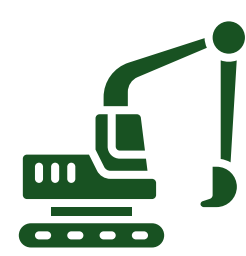

Weight :  
3150 kg

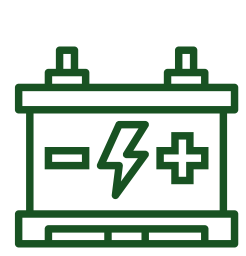

Reach :  
N/A

Width:  
1.272 m

Height:  
2.34 m

Engine Output :  
33.5 hp  
@2400RPM

## Earthworks

AFP carry out major bulk earthworks and soil stabilisation works for various high-profile customers. AFP machinery has built in GPS and over pressure units which allow us to work to specific built in designs whilst protecting the operator on hazardous sites. We strive as a company to provide high quality personnel and machinery which means our clients get full productivity and works delivered on time.

## Grounds Maintenance

Ground maintenance is a core service that AFP provide. We work for several high profile tier 1 clients who rely on us to run the day to day activities onsite. AFP have teams based on these sites with the skills, equipment and experience to provide a high quality service. Our clients find it a better solution to out source ground and site maintenance to AFP because it makes better business sense.

### Ground Maintenance Services include

Tree felling, Vegetation Management

Winter treatment works

Grass cutting

Hedge maintenance,

Fence repairs

Drainage works

## Site Remediation & Demolition

AFP offers specialist site remediation and demolition services including structure removal, ground treatment works and environmental works throughout the UK. Our demolition projects range from small residential works to large scale commercial premises.

We will survey your site and propose a plan of action that includes identifying hazardous materials, removal of hazardous waste, reclamation, and recycling. All materials are removed to licensed landfill or recycling sites. We will also provide a full Health and Safety Assessment before work commences.

Our Demolition Solutions include:

- Controlled demolition of structures
- Concrete crushing and stockpiling
- Asbestos cement removal
- Services terminations
- Dismantling of plant machinery and equipment

## Fencing

We can supply and Install all types of security, agricultural, ecological and domestic fencing

AFP offers a comprehensive range of fencing systems to meet all your requirements.

### Security and Perimeter fencing

- Galvanised and conductive Palisade
- Weldmesh
- Chainlink
- Mesh systems
- Fast track expanded mesh
- Security barriers and Intercoms
- We also supply gates for all of the above fencing systems

### Domestic Fencing

- Timber screen fencing
- Composite fencing
- Post and rail fencing
- Supply and fit timber gates
- Supply and fit timber decking
- Supply and fit composite decking

## Ecological Fencing

- Badger exclusion fencing
- 2 way badger gates
- Otter fencing
- Bat and Bird boxes

### Agricultural fencing

- Rylock sheep fencing
- Deer fencing
- Timber post and rail
- Rabbit fencing

## Ecological

### **IF YOU NEED AN ECOLOGICAL CONTRACTOR THROUGHOUT THE UK AFP CAN PROVIDE SERVICES BASED ON YOUR NEED.**

AFP Construction are specialists in ecological contracting including ecological mitigation works, habitat creation and habitat management.

### **ECOLOGICAL PROJECTS**

Examples of some ecological projects we have handled include:

- Bats – protection of bat nesting
- Badgers – relocation of badger sets
- Otters – relocation of otter dens (also called a couch or a holt)

We provide a complete range of ecological services working alongside our Ecologist partners and always strive to minimise the environmental impact of works we undertake.

If habitat mitigation is an issue (nesting birds, bats, reptiles, badgers, etc.) we look at all aspects of planning for development and associated habitat creation or enhancement.

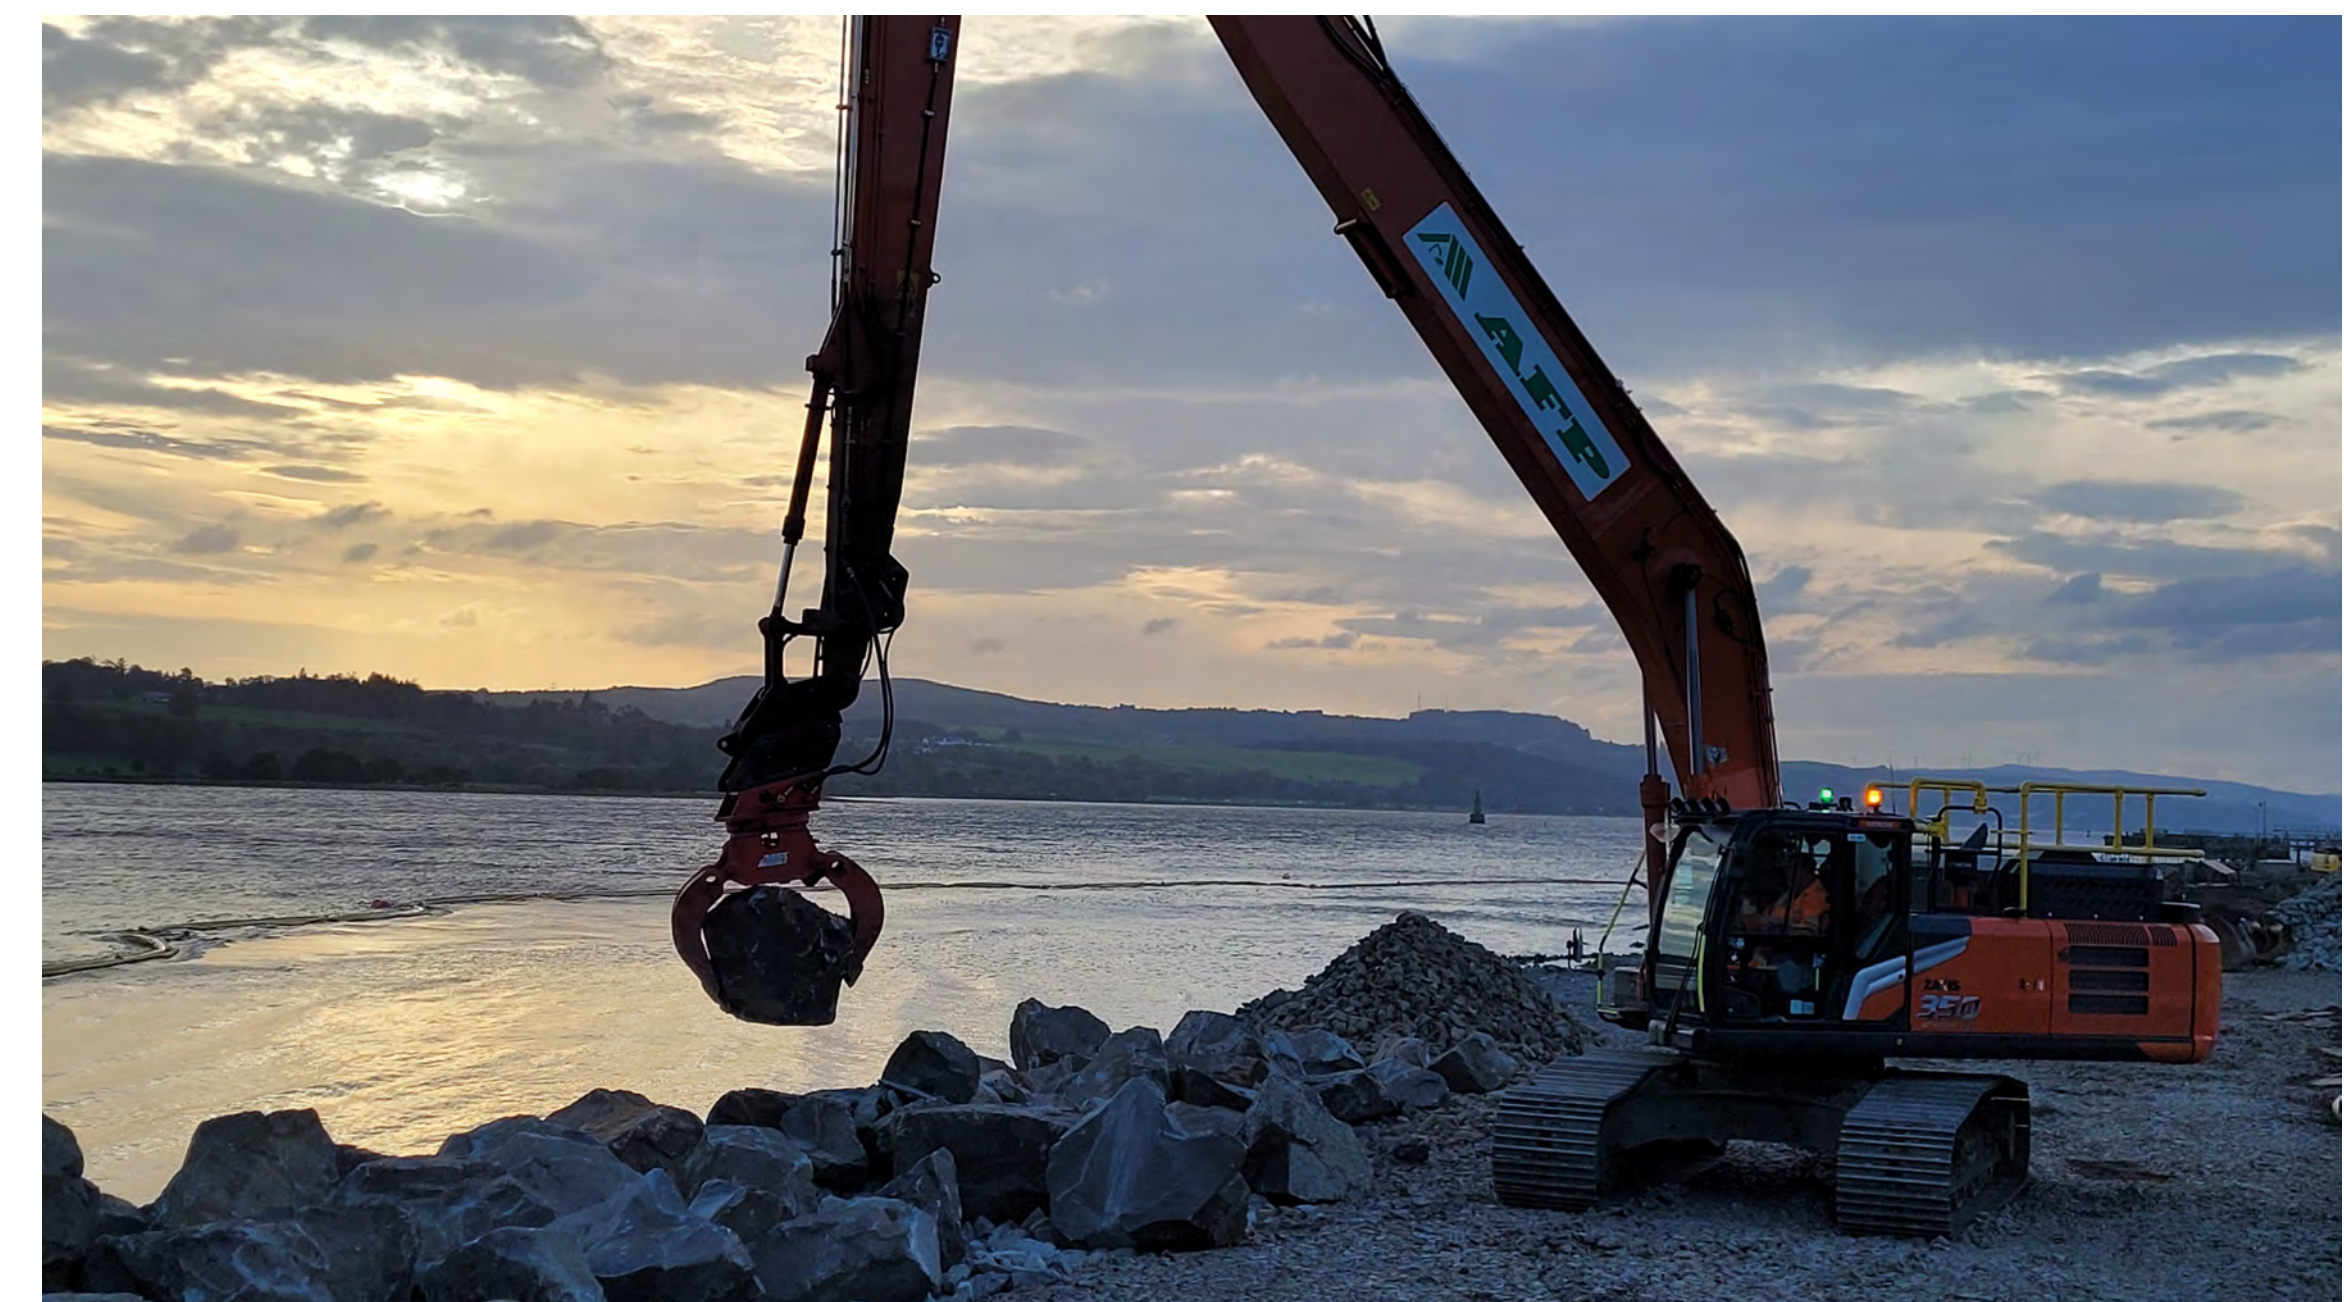

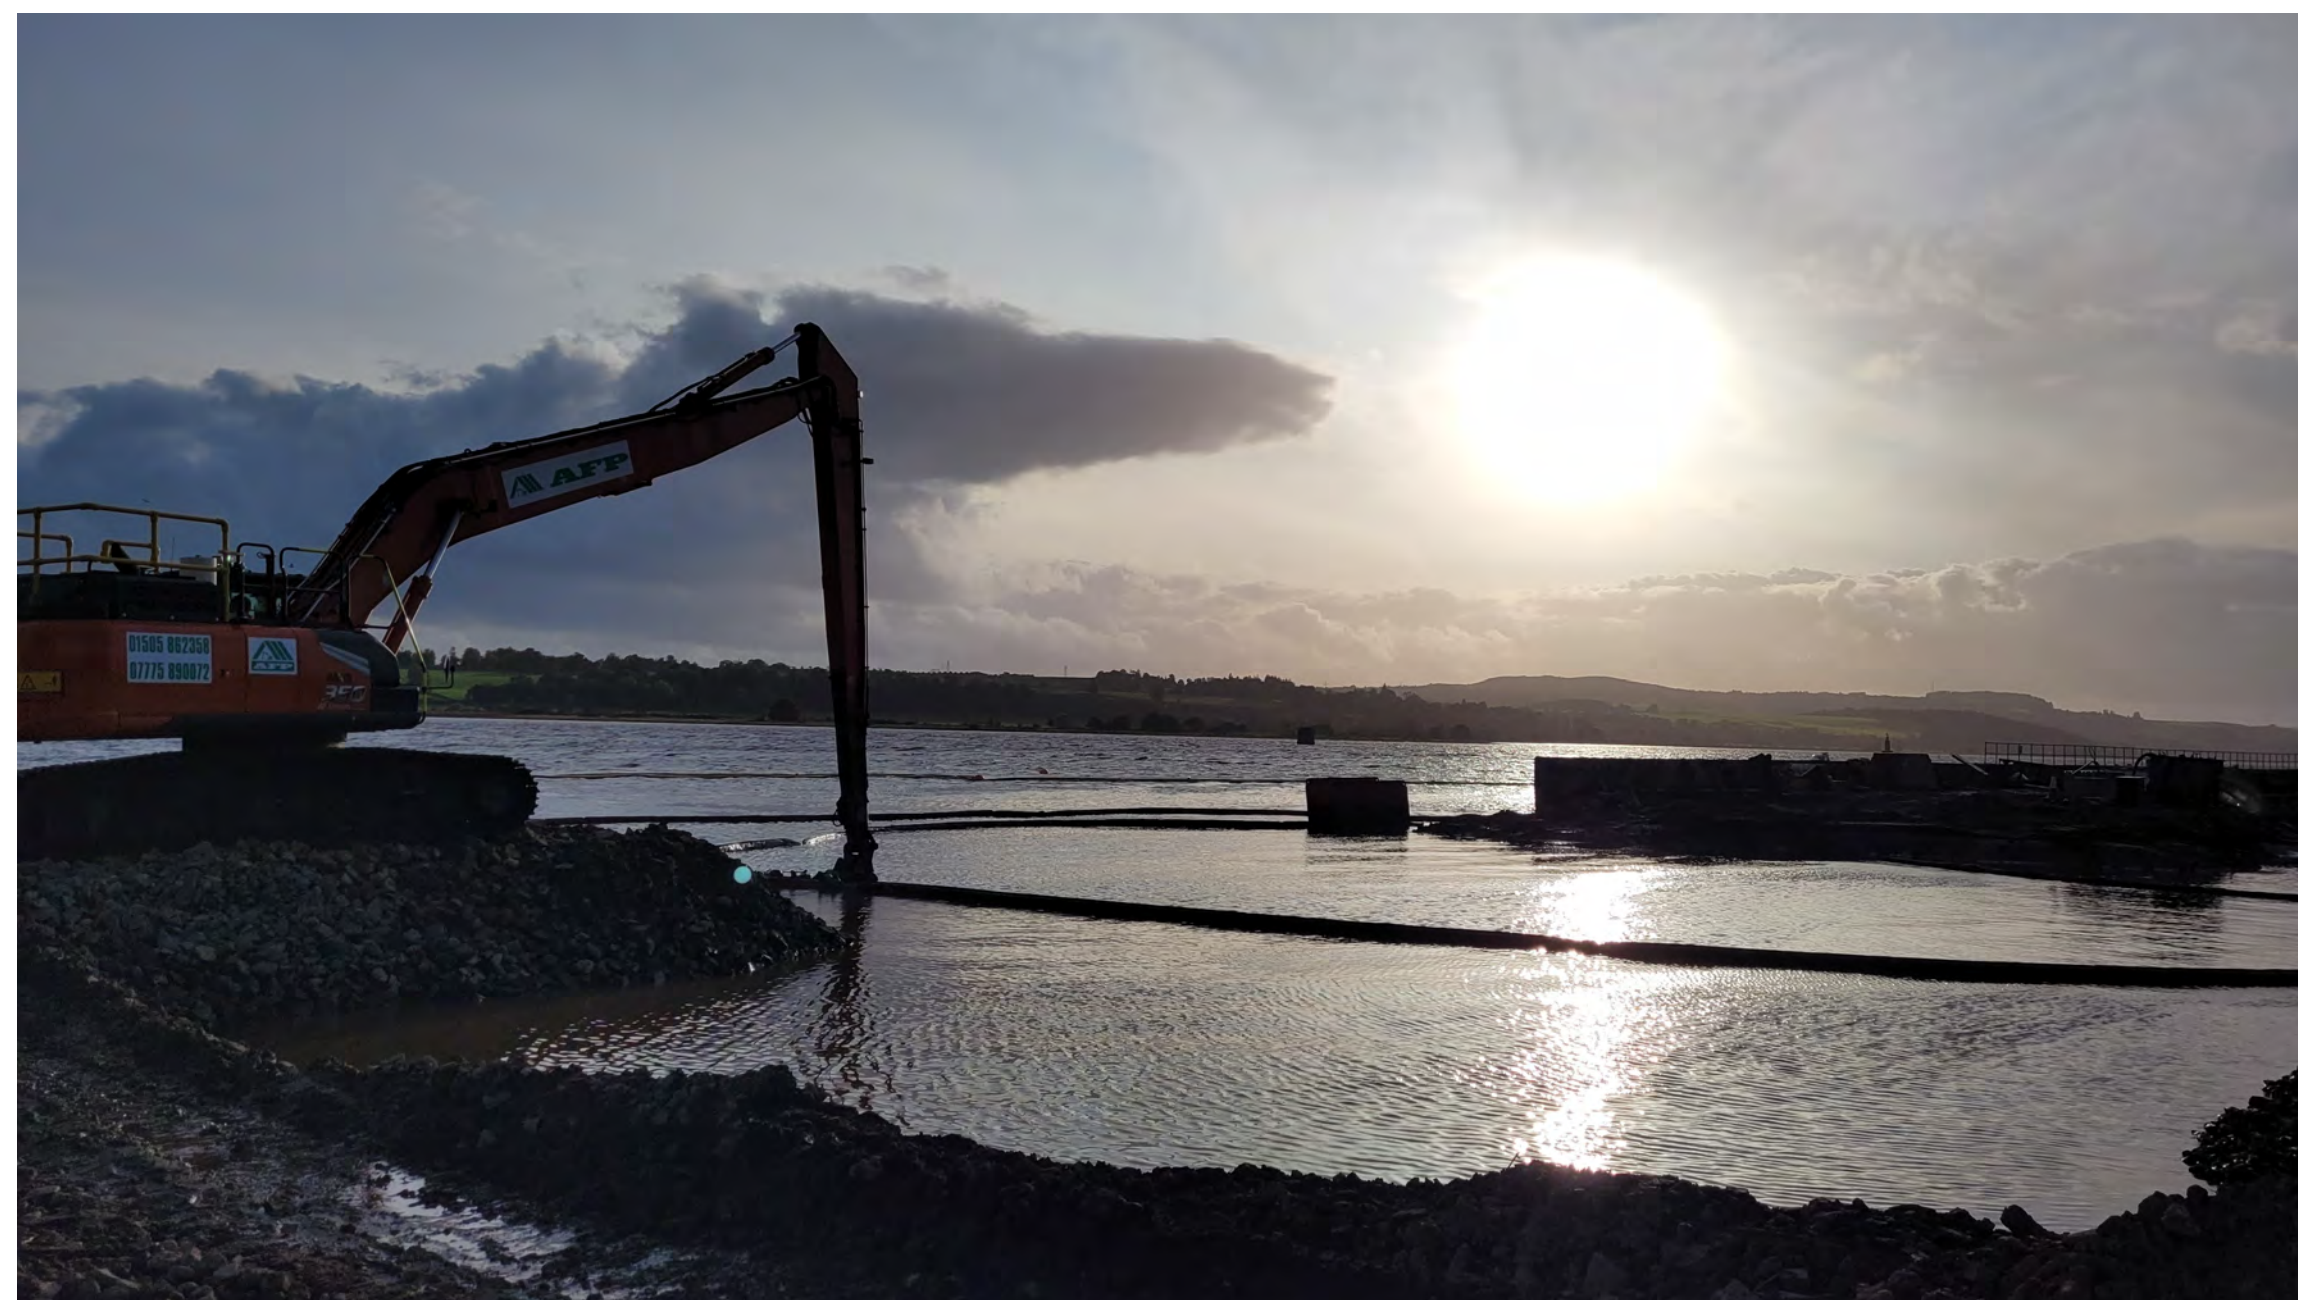

We are extremely adaptable and modify our skills and working practices to suit the specific site conditions we encounter. We have all the resources to ensure that your project is properly managed and executed including specialised personnel and machinery.

Where we need to employ care and skill to ensure minimum disruption to animals and wildlife our people are fully trained and knowledgeable about the sensitivity of the area, ecosystem and are made fully aware of the impact of ecological contracting generally.

## Revetment Works

AFP have carried out major revetment works for our International clients such as Deme Group, works involved removing existing river banks and creating new embankments and shorelines, we use specialised machinery such as our Hitachi ZX350LC super longreach, Komatsu PC290LCI and Hydrema 922G dump trucks for these projects. Procedures included in these works consisted of installing geotextile armour layer stone and rock armour. Designs and profiles were followed through the machines GPS system giving accurate and efficient results for the client.

## **Operated and Self Drive Plant Hire**

All our operated and self drive plant hire fleet is modern and well maintained. Every machine goes through an extensive documented pre-delivery inspection before it arrives on site, ensuring that it is in perfect working condition. We have an excellent relationship with plant machinery dealers which in turn helps our back up service in supplying parts quickly. As standard a fitter will visit your site to service , correct any defects and carry out general maintenance to all plant.

All our plant machinery within our fleet are supplied with delivery pack (i.e relevant machine certificate, CPC card, daily checklist book, fire extinguisher and first aid box).

## **Hire Conditions**

SPOA conditions of hire applies.

All tyre repairs and damage is the responsibility of the hirer. Insurance to be supplied by the hirer .

Chisels for hammers and tips will be chargeable for breakage or excessive wear.

Fuel to be supplied by the hirer unless otherwise agreed.

## **Contact Details**
